Highest quality of Reindeer Hides from the Arctic Circle

All the way from Rovaniemi in Finland, each hide is unique in colouring and markings.

They are primarily designed to be a decoration but they may also be used as a rug or throw. The hide may shed, which is completely natural. To prevent unnecessary shedding, please avoid stepping or walking on the hide. We do not recommend they be placed in high traffic areas.

We will provide care instructions to ensure your hide stays beautiful for many years to come.

In Scandinavia, the Reindeers roam free and are eventually sought for food, as is the tradition. The hide is a by-product and completes the sustainable recycling process.

Please note: each hide will be unique in marking and colouring

Size	W/sale ex gst	RRP
